ER Diagram

Tables

Table: rooms

Parameter Name	Data Type	Description
id	BIGINT (PK, AI)	Unique identifier for each room
title	VARCHAR(150)	Name/title of the room
description	TEXT	Detailed room description
capacity	INT	Maximum number of guests allowed
pricePerNight	DECIMAL(10,2)	Cost per night
imagePath	VARCHAR(255)	Path to the room image

Table: extras

Parameter Name	Data Type	Description
id	BIGINT (PK, AI)	Unique identifier for extra
name	VARCHAR(100)	Name of the extra (e.g., WiFi)
icon	VARCHAR(100)	Icon identifier for UI

Table: rooms_extras

Parameter Name	Data Type	Description
roomId	BIGINT (FK)	References rooms.id
extraId	BIGINT (FK)	References extras.id

Table: guests

Parameter Name	Data Type	Description
id	BIGINT (PK, AI)	Unique guest ID
firstName	VARCHAR(100)	Guest's first name
lastName	VARCHAR(100)	Guest's last name
email	VARCHAR(255)	Guest's email address

Table: bookings

Parameter Name	Data Type	Description
id	BIGINT (PK, AI)	Internal booking ID
bookingNumber	VARCHAR(30)	Public booking reference
roomId	BIGINT (FK)	References rooms.id
guestId	BIGINT (FK)	References guests.id
startDate	DATE	Booking start date
endDate	DATE	Booking end date
guestCount	INT	Number of guests
breakfastIncluded	BOOLEAN	Indicates if breakfast is included
totalPrice	DECIMAL(10,2)	Total booking price
status	VARCHAR(30)	Booking status (e.g., CONFIRMED)
confirmationDate	TIMESTAMP	Time of booking confirmation
createdAt	TIMESTAMP	Record creation timestamp

Table: arrival_infos

Parameter Name	Data Type	Description
id	BIGINT (PK, AI)	Unique identifier
bookingId	BIGINT (FK)	References bookings.id
directions	TEXT	Directions to the hotel
trainConnections	TEXT	Public transport information
contact	TEXT	Hotel contact details
